

We introduce **100% ECO friendly** and truly **sustainable** products produced from the paper board without a traditional plastic coating layer.

**Paper2Paper** products are plastic free and meet all the requirements in terms of liquid resistance and stiffness.

**Paper2Paper** products which are made from cardboard with water-based coating are better in comparison with traditional paper cups with plastic (PE) or bio (PLA) coating.

### See by yourselves:

Paper cup coating material	Is the product compostable?	Is it recyclable with paper?	Can it be collected in the existing waste collection infrastructure with no extra investments?	Are there known restrictions or additional taxes for using the product?
PE	NO	NO	NO	YES, from 2021*
PLA	YES, industrial only	NO	NO	NO
Water-based coating	YES	YES	YES	NO

\*EU restrictions from 2021 (6-year transition period)

**Paper2Paper** products do not require separate or additional waste collection system as they are **certified** for **recycling with paper**.

# Paper2Paper available products:

## Double Wall Paper Cups in three different sizes:

- ✓ 8 oz (~220 ml),
- ✓ 12 oz (~350 ml),
- ✓ 16 oz (~450 ml).

## Ice cream bowls in four different sizes:

- ✓ 4 oz (~120 ml),
- ✓ 8 oz (~240 ml),
- ✓ 6 oz (~180 ml),
- ✓ 12 oz (~350 ml).

We take recyclability and sustainability matters very seriously, therefore we eliminated all the plastic from the whole **Paper2Paper** products packaging – no plastic sleeves, no plastic adhesive tape, just paper.

The stacks of the paper cups or ice cream bowls are packed into the paper sleeves. The cardboard boxes are sealed with the paper adhesive tape.
